FREELANCE SINCE 2013 · TOULOUSE, FRANCE · REMOTE

Lead Front-End Developer.

React, React Native & cross-platform.

● AVAILABLE NOW full time or less

Max. Maxime Thirouin

I make front-ends simple. Simple is the hard part.

Almost two decades turning tangled front-ends into systems teams can actually maintain: simpler architecture, less overhead, and devs who level up along the way. Today I own the whole front-end, from architecture to release - strict types, end-to-end (E2E) tests and CI keep it safe at that pace.

YEARS	PROJECTS	CLIENTS	DOWNLOADS / MONTH	GITHUB STARS
19	**20+**	**15+**	**200M+**	**12.3K**
pro since 2007	freelance since 2013	companies served	on OSS packages I created	across 89 repos I own

Skills

Front-End Architecture

Simpler systems, less overhead, teams that ship.

- Modernizing legacy React codebases
- Design systems & component APIs
- Performance & rendering budgets
- Accessibility, validated by disabled users
- Release automation & end-to-end (E2E) testing
- Maintainability at scale
- Mentoring & technical direction

Languages & Tooling

TypeScript · JavaScript · Node.js · HTML / CSS · REST · GraphQL · Playwright · Detox · Storybook · CI/CD · Jenkins · Fastlane

Web / Native / Cross-platform

React · React Native · Expo · Web · iOS · Android · TanStack · Next.js

AI-assisted engineering

AI coding agents (Claude Code), daily · Precise intent in, working code out · Strict types, end-to-end tests & CI as the safety net

Experience

Lead Front-End Developer
Exem
Sep 2025 – Apr 2026

Interactive EMF data visualization on city maps. Put the map behind the whole app and kept it in sync both ways: every pan, filter and selection lives in the URL, so any view can be shared or restored, even with several maps on screen at once. Clustered the measurement points with Supercluster - far more than a map can draw - and shipped every component skeleton-first, so the UI never flashes empty.

100+ components built · End-to-end front-end ownership

Mapbox · React Strict DOM · TanStack Start · OpenAPI · Storybook · TypeScript

Lead Front-End Developer
Aardvark Intelligence
Apr 2024 – Jan 2026

Generative AI solution for automating legal and financial data. Built the virtualized spreadsheet-like editor that keeps the UI instant on tens of thousands of rows, then made Playwright guard its performance in CI - so the release train never shipped a regression.

50k+ rows · 2 weeks release cadence · End-to-end front-end ownership

Virtualization · Performance · Playwright · CI/CD · TypeScript · React Native Web

Lead Front-End Developer
Hove
2017 – 2018 · 2019 – 2023

iOS / Android & web apps built for cities and transport networks. Created the white-label transit app for cities and grew it across 20 client networks. Called back by the CTO a year later to rescue it: rebuilt it with a smaller, senior team, stabilized the product, and automated multi-client QA and releases with Jenkins and Detox end-to-end tests - one QA pass switches client networks in-app. Made the app fully accessible, validated by a disability users' association.

900M+ trips / year · 4M+ people served · 10 devs led · 1 click builds, QA & releases

React Native · React Native Web · Accessibility · Detox · Jenkins · Fastlane

University Lecturer
IUT Blagnac
2012 – 2015 · 2018 – 2020

Teaching C, web fundamentals & Agile methodology to university students. Taught alongside client missions - and the habit stuck: reviewing code to level up a team is the part of the job I like most.

200+ students taught · 6 years taught

Teaching · Agile · C · JavaScript · CSS · HTML

Open Source

1.3K followers · on GitHub since 2009

Contributing to open source since the early days. The PostCSS plugins I created - postcss-calc, postcss-custom-properties, postcss-color-hex-alpha & co - are downloaded 200M+ times a month. GitHub Arctic Code Vault Contributor.

cssnext Creator & Maintainer · 2014 – 2017

5.3k GitHub stars

130k+ downloads / week · 380+ commits · 20+ postcss plugins

Babel for CSS - write tomorrow's CSS today. My work lives on in postcss-preset-env.

stylelint Originator · 2015

10M+ Downloads / week Issue #1 started the project

Opened the first issue that started stylelint, now the standard CSS linter

phenomic Creator & Maintainer · 2015 – 2020

3.2k GitHub stars Next.js static rendering

One of the first React static-site generators - a precursor of Next.js SSG

rescript-react-native Maintainer · 2017 – 2022

35 Repos maintained

1.2k+ stars across the org · React Native API hand-mapped

Took over and grew the type-safe React Native bindings for ReasonML/ReScript

Also: **PostCSS** org creator, 500+ commits · **react-native** core contributions

Additional Experience

2023 – 2026	**Full-Stack Developer** · FKLG Production	Video-production portfolio & VOD platform for Kyan Khojandi.
2024	**Front-End Developer** · Enjoy App	Mobile app to find food and drinks near you
2019	**Front-End Developer** · Loewe	TV/media remote app made with React Native, ReScript, GraphQL & Apollo
2016 – 2017	**Lead Front-End Developer** · Mphasis	Web app built to manage dynamic resources with a complex database
2015 – 2016	**Lead Mobile Developer** · One2Team	Mobile (iOS / Android) app to manage customizable lists of configurable resources
2015	**Senior Front-End Consultant** · Molotov.tv	Audit for Molotov.tv fresh React codebase for desktop website
2015	**Front-End Developer** · BeOp	Third-party widget for brands and publishers
2014 – 2015	**Lead Front-End Developer** · ViaReport	Modernize a legacy bulky UI into an accessible one with modern techs
2014	**Front-End Developer** · Airbus	Companion web app for Airbus live events

Earlier: Social Share · Jirafe · Shopbot · Fittingbox · Roularta Media Group · Kiweb.

Testimonials

> As CTO at Hove, I was lucky to have Maxime in my teams **for at least 3 years**. He is truly a **top React expert** — whether it's React Native or React.js, nothing stands in his way.

Aissa Belaid
CTO at Hove

> Max is one of those really rare engineers who doesn't just work on a project but **takes ownership of it** as well. [...] As a scrappy startup where absolutely every dollar mattered [...] we found ourselves **consistently looking for reasons to hang on to Max**.

James Feore
Co-Founder, Aardvark Intelligence

> He's always **available and a real teacher**, which is how I got to grips with React Native so quickly. He loves sharing his thirst for learning, which is **a real driving force for a team**.

Alexandre Broutin
Software Engineer at Hove
